

Power Headset for Marine Helmet 4.190.01.1

The Stop Noise Power Headset for Marine Helmet is made to fit Gecko open face helmet and to be connected to THR880i TETRA terminal. It is designed for jet ski, RIB etc. marine use. The set includes earphones for both ears (amplified audio), an adjustable boom microphone and a coiled cable for connecting the headset to the terminal. The boom microphone and PTT switch are attached to the left earphone as default but different setups can also be made. The headset is water resistant but not submersible: IP54.

Stop Noise Power Headset for Marine Helmet was developed for various authorities; for example the police and SAR (search and rescue). It is designed for demanding use even in extreme conditions.

Safety, Ergonomics and Ease of Use are key words for Stop Noise products.

Stop Noise Helmet Headsets are designed and made in Finland from high quality materials to meet the standards and authority requirements.
