Hybrid X Tactical Extension

The Hybrid X combines mission critical voice communication with high speed data.

The Hybrid X concept offers a tactical user interface for Bittium Tough Mobile rugged and secure LTE smartphone. In addition it offers the possibility to use a PMR radio terminal from the same device. The concept has been designed to fulfill the needs of critical communications professionals in different operating environments.

In addition to voice and data communication the Hybrid X offers also body-worn camera functionality in the same device.

Features

- Secured mission critical audio communication through dedicated PMR network (e.g. TETRA)
- Secure cable connection to the PMR terminal as default (wireless as option)
- DSP (Digital Signal Processing) guarantees clear and loud audio when transmitting and receiving even in noisy environments
- Large buttons for convenient operation even with gloves on (PTT, support for secondary PTT etc.)
- Touch screen user interface for different applications (works with gloves on)
- High speed data through LTE network (available as encrypted)
- Wi-Fi and Bluetooth connectivity
- Body-worn camera functionality with an option for extra wide angle lens
- Possibility to stream real-time video
- Extendable memory for photos and videos
- Red LED for enhanced barcode scanning in bright sunlight
- IP67 rated protection from water and dust
- MIL-STD rated durability

Patented, patent no. 126990

Optional Features / Accessories

- Radioactivity detector enables an intelligent radioactivity warning system for the whole organization
- Wireless connection (Bluetooth) to the PMR terminal
- Proprietary Smart Holder for convenient carrying, keeps the touch screen safe and enables charging on the go
- Power bank connection cable for the Smart Holder
- 170° extra wide angle lens for the Smart Holder enhances body-worn camera use
- Vehicle holder that enables charging, using external display and using the LTE terminal as a dashboard camera
