STOP NOISE

For improved performance

Multi Handset with camera

Keypad speaker microphone with camera barcode reader. Compatible with Airbus DS TH1n and THR9i TETRA terminals for example.

This Stop Noise Multi Handset is a keypad speaker microphone with a camera for reading 1D and 2D barcodes and taking digital photos. The barcode data can be automatically sent over TETRA network. The keypad supports many TETRA radio functions, for example: group selection, status messaging and volume control. The Multi Handset includes also an emergency button for enhanced user safety and the optional features e.g.integrated LED torch light and vibration alert provide additional convenience for the user.

Specifications

- Clear and loud audio on both transmit and receive
- Integrated camera that is optimized for efficient barcode reading
- A MicroSD memory card slot which enables storing digital images and barcode data
- Integrated battery can be charged through the Micro USB connector or via the radio terminal or directly with the radio's standard charger
- 3,5m earphone jack on the side of the handset
- Large PTT switch can be easily operated even when wearing heavy gloves.
- Heavy duty construction featuring UV-protected polyurethane cable and impact resistant polycarbonate housing
- Robust connector with thumb screw securing
- Modular cable can easily be replaced in the field.
- On the backside the Multi Handset has a metal knob for attaching to many different carrying solutions.
- Duplex call possibility with an earphone
- Supports duplex emergency calls even without earphone
- Approximate weight: 220g
- Water resistant, IP55
- RoHS compliant

Optional features

- power LED torch light
